DETAILED ACTION

Election/Restrictions

Claims 30-61 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claims 30-61, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/22/2005.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:
Regarding claims 1 and 11:

The primary reason for the allowance of claim 1 is the inclusion of the method steps of: calculating an uncertainty ratio for the source at the confidence level based on coefficients of variation of an export coefficient and the removal efficiency, the uncertainty ratio indicating the portion of the load that will be generated by the source with the confidence level. It is this feature found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claim 11 is the inclusion of the method steps of: calculating an uncertainty ratio for the source at the confidence level based on a coefficient of variation representing an uncertainty in the load of the source, the uncertainty ratio indicating a portion of the load that will be generated by the source with the confidence level. It is this feature found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-10 are allowed due to their dependency on claim 1.

Claims 12-29 are allowed due to their dependency on claim 11.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Faeth (2002/0055902) teaches methods, apparatus and articles of manufacture for managing nutrient trading, Boles et al. (USPUB 2003/0047508) teaches high efficiency processes for destruction of contaminants, Polizzotto et al (USPUB 2003/0222005) teaches an apparatus and methods for reducing contaminants in water systems using information distribution, Polizzotto et al (USPUB 2003/0230523) teaches mapping and pollution information site apparatus and methods and Kodukula et al. (USPN 6845336) teaches a water treatment monitoring system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
